

Appending of custom items to shell menu never was easier

Add your items to Windows Explorer context menu - it never was easier: Explorer Context Menu Platinum v4.20 was released

Today was released new version (v4.20) of Explorer Context Menu Platinum - leading solution for custom menu items appending to Windows shell context menu. In it were implemented variety of new features, that make appending of custom menu items to Windows Explorer context menu as easy as never before.

Among the main improvements in the new version of Explorer Context Menu Platinum are:

- Your icons in Windows Shell context menu became even more vivid with advanced menu item icons support - Now you can use as shell menu item icon any image of any size and with any content - it will be processed automatically to be shown in the Windows Shell context menu in the best way. As you custom item icon you may use icon of any type - ICO, JPG, GIF, PNG, PSD, etc. image, of any size and loaded from any location - from embedded resource, from external file, from binary data and from many other sources. Showing of icons for your menu items never was easier.
- Unlimited nesting level for all your sub-menus, that you append to Windows Explorer context menu with Explorer Context Menu Platinum. Now you may append as deep sub-menus, as you want. And all it - with one simple, one-word command.
- Appended full support of all types of 64-bit Windows operating systems. Now all your custom menu items will be shown also on Windows XP x64, Windows Vista x64, Windows Server x64 - on all computers your menu items will be shown to your users directly as they are shown on yours.
